## SUMMARY

### Summary

Full-stack engineer focused on shipping AI workflow systems, useful automation, and product infrastructure that holds up in real teams. Earlier work spans platform-scale frontend, immersive product development, and automation-heavy environments.

AI ORCHESTRATION

WORKFLOW SYSTEMS

PRODUCT ENGINEERING

FRONTEND AND BACKEND

JAVASCRIPT / NODE.JS / REACT

MACHINE LEARNING

## EXPERIENCE

### Experience

#### Trullion | Full Stack Engineer

APR 2022 - JUN 2025

Shipped user-facing and internal workflows for an AI platform used by finance, accounting, and audit teams, working across frontend and backend.

#### Magnifica | Software Engineer

DEC 2019 - JUL 2021

Built VR and AR training software and motion-driven simulation experiences in a small R&D team spanning hardware and software.

#### Wix | Frontend Developer

JUN 2017 - DEC 2018

Shipped frontend features inside a large-scale web creation platform, strengthening release quality and product engineering discipline.

#### Selina | Frontend Developer

MAY 2019 - AUG 2019

Built consumer-facing web flows with product and design in a fast-iteration hospitality environment.

#### Virtuka | Co-Founder

JUN 2016 - MAR 2017

Built the MVP for a personalized VR startup in WebVR using JavaScript, Node.js, HTML, CSS, and AWS.

#### Earlier Experience

2014 - 2016

Fireglass: automation and regression testing. IDC Media Innovation Lab: research assistant and IoT developer on assistive-tech systems including TangiPlan.

## EDUCATION

### Education

#### Reichman University

2022 - 2025

M.Sc., Machine Learning and Data Science

Graduated | GPA 90.94 / 100

#### IDC Herzliya

2013 - 2016

B.Sc., Computer Science

Minor in Business Administration | GPA 87.43 / 100

## ADDITIONAL STUDY

### Additional Study

#### St. Francis Xavier University

WINTER 2016

Exchange semester in Computer Science and Business Administration.

#### Birthright Israel Excel Ventures Program

JUN - AUG 2016

Excel Fellow and Ventures Program participant.

#### Wix Kickstart

BOOTCAMP

Front End Web Developer Bootcamp.

## CORE AREAS

### Core Areas

AI orchestration, workflow systems, developer tooling, and frontend/backend product engineering.

JavaScript, React, Node.js, AWS, machine learning, and data science.

Tools in rotation: Claude Code, ChatGPT, Codex, Grok, LM Studio, Gemini, DeepSeek, Cursor, Copilot, GitHub, Hugging Face, Google Colab, NotebookLM, Perplexity, Windsurf.
